

STRANZ LOGISTICS

Company Profile

Professional Transportation & Logistics Management Solutions

Company Overview

Stranz is a professionally managed logistics and transportation company delivering structured, reliable, and execution-driven surface freight solutions across India. We specialize in full truckload and cargo transportation supported by dedicated coordination teams and continuous vehicle follow-ups. Our operations are designed to function the way an ideal logistics system should — with accountability, discipline, and transparency at every stage of movement.

Our Mission

To provide dependable, cost-effective, and professionally managed logistics solutions through disciplined execution, proactive coordination, and customer-focused service delivery.

Our Vision

To become a trusted logistics partner for businesses by setting high standards in transportation reliability, operational control, and long-term customer relationships.

How We Operate

Each shipment handled by Stranz is assigned a dedicated logistics coordinator who owns the movement end-to-end. From vehicle placement and dispatch planning to transit monitoring and delivery confirmation, our team ensures proactive follow-ups, route adherence, and timely communication, minimizing delays and ensures consistent service performance.

Our Core Services

- Full Truck Load (FTL) Transportation

We provide full truckload transportation services where a dedicated vehicle is allocated exclusively for a single customer's cargo. This model ensures faster transit, minimal handling, enhanced cargo safety, and predictable delivery timelines. Our team manages the entire execution cycle from vehicle placement to final delivery confirmation.

- Fully Closed Truck Services

Our fully closed truck services are designed for cargo that requires protection from weather, dust, and external exposure. This service is ideal for FMCG goods, electronics, pharmaceuticals,

packaged materials, and high-value consignments. Vehicle condition checks, secure loading practices, and disciplined transit monitoring ensure cargo integrity throughout the journey.

- Cargo Transportation Services

Stranz handles a wide range of cargo including industrial goods, raw materials, consumer products, and special consignments. We focus on correct vehicle selection, load optimization, and safe handling practices to ensure efficient and damage-free transportation.

Tailored & Case-Specific Logistics Solutions

Understanding that standard logistics models may not suit all cargo movements, Stranz offers customized, case-specific logistics solutions based on cargo characteristics, delivery timelines, and operational constraints. Each movement is planned with focused coordination, route assessment, and execution control to meet unique customer requirements.

Fleet & Vehicle Capabilities

Stranz provides access to a diversified and scalable fleet designed to support varying cargo volumes, load dimensions, and operational requirements. Vehicle allocation is planned based on cargo type, loading conditions, route feasibility, and delivery timelines to ensure efficiency and cost optimization.

- Truck Body Types: Open Trucks, Closed Trucks, Side Open Trucks
- Vehicle Sizes: Tata Ace (7 ft), Bolero / Dost (8 ft), 12 ft, 14 ft, 17 ft, 20 ft, 24 ft, 32 ft
